

Mag Helper /HC-MGH

Have you ever needed a hand in tight spaces? How about two hands? With the Mag Hand, you can have just that!

The Mag Hand features a neodymium magnetic base and a Y-connector to support two arms to help you in the tightest of situations. The clips can swivel 360 degrees and are covered in heat resistant silicone to prevent melting or marring while you work.

This works extremely well on any ferrous surface, vertical or horizontal.

- Two swiveling clips with silicone covers
- Neodymium magnetic base
- Full articulation in all directions
